DETAILED ACTION

1. This office action is in response to application 10/798,676 filed on 3/11/2004.

Claims 1-27 remain pending in the application.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-24, drawn to a method/a system/ for analyzing and scanning a virtual layout, classified in Class 716, subclass 4.

II. Claims 25-27, drawn to a computer readable medium for scanning and detecting connectivity between structures in a virtual layout, classified in Class 716, subclass 5.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II since the inventions belong to different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that the required for response to this requirement is **30 days, not one month.**

Art Unit: 2825
